

security and compliance requirements for our hosted clients despite significant differences in their PeopleSoft Internet Architecture implementation.”

As part of the platform, SecureVue’s next-generation security information management (SIM) enables CedarCrestone to improve operational efficiency by strategically addressing evolving security threats through the following functionality:

- **Log Management:** collects, archives, correlates and reports on event data from all devices, servers, and applications
- **Vulnerability Analytics:** scans assets on demand to identify, track, and report system vulnerabilities
- **Configuration Analytics:** detects, correlates, alerts, and reconciles configuration changes as well as enforces control policies across the IT infrastructure
- **Asset Analytics:** centralizes the tracking and management of hardware and software assets to improve visibility and diminish asset oversight
- **Performance Analytics:** collects and analyzes performance data from all network devices and servers to proactively monitor network health
- **Network Behavioral Anomaly Detection:** profiles all NetFlow, C-Flow, S-Flow and J-Flow data to identify and alert on anomalies based on resource utilization, application usage and behavioral patterns

The platform’s IT governance, risk, and compliance (GRC) functionality also enables CedarCrestone to establish and manage internal policies while meeting regulations, best practices, and standards.

“Managed service providers like CedarCrestone, whose reputations rely on the security they provide to their customers, are increasingly realizing the correlation power and security that SecureVue delivers,” said John Sullivan, Senior Vice President, Field Operations of eIQnetworks. “An integrated security, risk, and audit management platform meets complex security and compliance requirements by doing more with less in today’s challenging economic environment.”

About CedarCrestone

CedarCrestone provides systems integration consulting, and comprehensive managed services for the deployment, management, and optimization of Oracle’s PeopleSoft Enterprise Human Capital Management (HCM), Financial Management Systems (FMS), and Campus Solutions (CS), along with solution-defining Strategy & Analytics services. As a Certified Advantage Partner of Oracle Corporation, CedarCrestone has extensive expertise in Oracle technology and PeopleSoft Enterprise applications.
